Cool Off in Your Old Home with Unico

The Unico System has helped upgrade over a half-million homes with better and less obtrusive indoor comfort. While Unico's small-duct systems benefit homes of all styles, sizes, and ages, it is specifically designed to solve the challenge of adding indoor comfort to older, architecturally significant homes.

Simply put, The Unico System fits where traditional HVAC systems can't. Its installation process is non-invasive to the existing configuration of your home, eliminating the need for disruptive remodeling. Its small, inconspicuous outlets can be painted, wallpapered, or stained to blend into virtually any decor. Its operation is whisper-quiet, and you won't feel the hot and cold spots and drafts associated with traditional forced-air systems. The system's superior energy efficiency means your utility bills won't rise when temperatures do.

These benefits are why The Unico System is the **first choice for preservationists** at historic properties like President Lincoln's Cottage in Washington, D.C., and the Ernest Hemingway Home and Museum in Key West, Florida.

Whether you've just moved into a fixer-upper with lots of charm, or you've finally decided to update your historic home with modern amenities, The Unico System small-duct HVAC is the indoor comfort solution for you.
