Paper \$18.00 • ISBN 0-87842-517-9
ISBN 978-087842-517-4 (13 digit)

Publication Date: March 1, 2006

Natural arches and bridges,
towering sandstone walls and
vibrantly colored dunes,
goblins and hoodoos -
Southern Utah is a
fascinating geologic
wonderland!

Geology Underfoot in Southern Utah explores the stories behind 33 handpicked sites—some world-famous, others off the beaten path. Marvel at tales of ancient eruptions, deserts, seas, and swamps; the movements of massive rock units over eons; and the rock's interactions with the life above it, including humankind. Along the way, residents and travelers will visit dinosaur trackways, old mines, rock glaciers, oysters in the desert, and much more. The authors include sites in Zion National Park, Natural Bridges National Monument, Bryce Canyon National Park, Canyonlands National Park, Arches National Park, Coral Pink Sand Dunes State Park, Escalante State Park, Fremont Indian State Park, the La Sal Mountains, and many more.

Richard L. Orndorff teaches geology at Eastern Washington University. With paleontologist and biologist **Robert W. Wieder**, he is also the coauthor of *Geology Underfoot in Central Nevada*. Photographer and writer **David G. Futey** has been exploring and researching the geology and wilds of Utah for over 12 years.

Geology Underfoot in Southern Utah is available from bookstores and other retail outlets or from Mountain Press at 800-234-5308 or www.mountain-press.com.
