

# Saturday April 28<sup>th</sup>, 2018

# Desert Bloom Day

Join us for this new all-day event at the Silver Reef Museum celebrating the many and varied desert blooms that adorn Silver Reef and the surrounding area. Special programs set up in the Cosmopolitan Building are sure to give you that springtime fix of the beautiful blooms frequenting our deserts, and hopefully our grounds will put on a fine display too.

**Admission \$5 Per Person Family Rate \$10**

Family Rate applies to one immediate family with up to two adults and children under 18 years old.

Admission includes all special Desert Bloom Day events, the Silver Reef Museum, the Mine Exhibit tour, and day only access to other outside areas.

## Schedule of Day's Events

- |                      |                       |   |

(Follow the Trail Signs Behind the Cosmopolitan Building)

Renowned Western Artist Jerry Anderson's Sculpture Studio Will be Open 10am - 5pm

# Featured Lecturers

## The Beauty of Desert Plants

**Ryan White**

Red Hills Desert Garden Manager

Having been raised in Southern Utah, Ryan has red dirt in his blood. He began college as a music major (trumpet) before discovering a hidden passion for landscaping and plants. He switched majors and graduated with a degree in landscape management then went on to receive a master's degree in landscape architecture from Utah State University. Following grad school, Ryan and his wife were thrilled to come back to Southern Utah where Ryan spent several years working for a landscape contractor specializing in design/build. When a position opened up to manage Red Hills Desert Garden he jumped at the opportunity and has been there ever since.

## Some Native Plants

**Lee Hughes**

Native Plant Expert

Lee was a former Ecologist and Rangeland Management Specialist with the Arizona Strip District BLM office. Among other things he managed rare and endangered plant species, participated in forest restoration work, and engaged in fire logistics. Besides Utah and Arizona, Lee had assignments in Colorado, Nevada, and New Mexico, adding to his knowledge about plants native to the Western United States. Now retired, Lee is still considered one of St. George's leading authorities on native plants. He continues to advocate locally for the use of native plants in yards, and in doing so conserving water in our arid environment.
