GREATER ZION COMMUNITY LECTURE SERIES CELEBRATES 20 YEARS AT THE ST. GEORGE DINOSAUR DISCOVERY SITE AT JOHNSON FARM

The boards of three local nonprofit organizations are pleased to announce the February Greater Zion Community Lecture. This month's lecture will be held on Wednesday, February 19 at 7:00 p.m. at Dixie State University's Science Building, room 115.

Join us in celebrating the 20th Anniversary of the St. George Dinosaur Discovery Site! Senior staff will review future expansion of the site and upcoming exhibitions. The presentation will begin with a slideshow centering on the museum's past, from the early days of the discovery, to building the museum and the various completed building projects completed. Diana Azevedo, Director of the Site, will report on the museum's attendance statistics and upcoming projects. She will also extend an invitation to the 20th Anniversary Celebrations at the museum during the last week of February.

Andrew Milner is the Dinosaur Discovery Sites Curator and Paleontologist. He has been with the site since its discovery in 2000. He hails from Quebec, Canada and his passion is invertebrate fossils. Diana Azevedo is the Executive Director for the Dinosaur Discovery Site. She has a Master's in Archaeology from Utah State and did her research on pre-Columbian Jamaica.

All interested community members are invited to attend this free lecture.
