Dear Editor,

I just finished looking at the so - called survey the promoters of a name change for Dixie State University has distributed to the public. What a "JOKE?" The bias questions presented are mandatory to complete the survey. After you have been forced to answer the biased questions which can be used to favor the name change, the survey gives you a chance to say what you want to say.

What I want to say is, stop the nonsense and let the public vote or leave the name as it is. Just because it appears that the printed media favors the elite wanting a new change at Dixie State University, doesn't mean that the general public supports it.
