

N.Y.A. Project Approved For Dixie College

A N.Y.A. project for the Dixie junior college has been approved, according to Pres. Glenn E. Snow.

This project will make it possible for not more than 25 individuals to carry 12 hours of vocational work at the college. Plans are underway to put this program into operation in the near future.

Business training, mechanic arts and home economics are among the vocational courses offered at the college. Those who enter the college under the provisions of this project will be permitted to take one cultural class.
