

Possibilities Seen For Aeronautics At Dixie

The possibility for aeronautical training at Dixie college was announced by Pres. Glenn E. Snow following his return from Salt Lake City this (Thursday) morning. While in Salt Lake City Mr. Snow consulted with the State Aviation committee, N.Y.A. officials and State Board of Education.

While nothing definite is available at this time, Mr. Snow reports that applications have been made for a training plane, fuselage, engine and parts with the view to providing training in cooperation with the army under any proposed plan that they may put in operation. Any plan to be adopted at Dixie would have the approval and backing of the proper military and educational authorities states Mr. Snow.
