III STATE ACTIONS AND APPROACHES TO THE INVENTORY.....	113

## INVENTORY OF OPEN DUMPS

The Resource Conservation and Recovery Act (RCRA or the Act) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

EPA has provided funds to State solid waste management agencies to evaluate disposal facilities against the Criteria. Through such evaluations the States have been able to identify facilities which do not comply with the Criteria and are, therefore, "open dumps". The facility evaluations leading to publication of the inventory were conducted by State agencies as part of their effort to develop and implement State solid waste management plans in accordance with the Act.

### STRUCTURE OF SUBTITLE D PLANNING PROGRAM

Subtitle D of the Resource Conservation and Recovery Act (RCRA or the Act) established a voluntary program through which participating States received Federal financial support to develop and implement solid waste management plans. EPA's role in the program has included publishing guidelines for States to follow in developing their plans, providing funds for the States, and approving those State plans which meet the requirements of the Act.

On July 31, 1979, EPA published "Guidelines for Development and Implementation of State Solid Waste Management Plans" (40 CFR 256, 44 FR 45066-45086). The Guidelines are based on Section 4003 of the Act, which lists the minimum requirements with which State plans must comply. Section 4007 of the Act provides for EPA approval of State plans meeting the requirements.

### Role of the Inventory

One requirement listed in the Act and addressed in the Guidelines is that "the plan shall provide for the closing or upgrading of all existing open dumps within the State ..." To aid the States in satisfying this requirement, EPA has funded State efforts to identify open dumps so that they can plan to provide for their closure or upgrading. In furtherance of this planning effort, the Act requires that EPA publish an inventory of open dumps. Publication of the inventory will serve to inform the Congress and the public of those facilities which the States have found to be open dumps.

## Classification Criteria

For purposes of State planning and the inventory, the Act defines the term "open dump" to mean "... any facility or site where solid waste is disposed of which is not a sanitary landfill which meets the criteria promulgated under Section 4004 and which is not a facility for disposal of hazardous waste." Thus, any facility which fails to comply with any one element of the Criteria is an open dump.

### OPEN DUMPING

In addition to establishing a mechanism whereby States, with EPA assistance, provide control over facilities which are found to be open dumps, RCRA prohibits the practice of open dumping of solid waste as a matter of Federal law.

In EPA's view, the Federal prohibition may be enforced in Federal District Court through the citizen suit provisions in Section 7002 of RCRA. The Act does not give EPA authority to take legal action against parties that may violate the open dumping prohibition. Whether specific acts of specific individuals constitute the prohibited practice is a matter for the Federal courts to determine in the context of particular cases after de novo review of the facts in each case. In reviewing a case de novo, the court is not bound by the State's determination that a facility is an open dump. Rather, the court will make its own finding of fact and rule accordingly.

In EPA's view, the open dumping prohibition is a provision of Federal law which stands on its own, separate from the State planning program. The inventory of open dumps is a publication of State findings from State planning efforts to satisfy the requirement of Section 4003 of the Act. The inclusion of a facility in the list of open dumps is not an administrative determination by EPA that any particular parties are engaging in the prohibited act of open dumping.

A determination for purposes of the open dump inventory need not precede an open dumping suit. However, before the results of the inventory may be used to support a legal determination that open dumping has occurred, the court would have to determine that the classification was a correct application of the criteria and that the defendant was responsible for actions violating the criteria. The court would be obliged to review the sufficiency of the State's classification of a facility and not simply defer to the State's decision.

## **DESCRIPTION OF INVENTORY**

The first installment of the inventory was published on May 29, 1981 (46 FR 29064-29149). It reflected the initial efforts of the States in evaluating a portion of the total universe of facilities and represented a fraction of the total number of open dumps likely to exist. The second publication of the inventory, published on April 29, 1982 by EPA, reflected subsequent efforts of the States in evaluating facilities during fiscal year 1981. Those facilities found to be open dumps were added to the initial list, and facilities found no longer to be open dumps were deleted.

This third publication of the inventory reflects additions and deletions to the list which were provided by the States during FY 1982. Subtitle D funds were not available to the States during FY 82. States, however, were permitted to use Subtitle D funds carried over from FY 81. Only 18 States submitted inventory additions and deletions for this edition of the inventory.

### **Actions on Facilities**

Because the inventory lists facilities which the States have found to pose a reasonable probability of adverse effects on health or the environment, participating States will be planning for the closure or upgrading of these facilities pursuant to State authority. Specific actions may vary, including issuance of a State administrative order or the gathering of additional data. In some cases, States already have placed listed open dumps on compliance schedules for closure or upgrading prior to publication of this list.

All such actions are to be taken under State law and through State regulatory and administrative procedures. Interested parties may wish to contact the State solid waste management agencies (Appendix II) concerning the current status of any of these open dumps and the responsibilities the agencies have under State law.

### **State Approaches**

EPA's Planning Guidelines require the plans of participating States to provide for an orderly time-phasing of the evaluation of disposal facilities to determine which facilities are open dumps. Thus, there is considerable flexibility for the States to set priorities for evaluating facilities. The establishment of these priorities is part of the State plans subject to the public participation provisions of 40 CFR 256.60.

The States have taken differing approaches in ranking facilities for evaluation and in conducting evaluations. For example, where States already had extensive data on hand, they could more easily rank their facilities for evaluation or make noncompliance determinations. Otherwise, resources had to be expended in locating facilities and gathering information, and fewer determinations would be likely to be made over the year.

For this third installment of the inventory, most participating States provided the Agency with brief descriptions of actions and approaches they have taken in evaluating facilities. These descriptions are included Appendix III. Further information may be obtained from the State agency personnel listed in Appendix II.

### STATE CONTACTS FOR OPEN DUMP INVENTORY

#### ALABAMA

Alfred S. Chipley, Director  
Land Program  
Alabama Department of Environmental  
Management  
State Capitol  
Montgomery, Alabama 36130  
(205) 834-1303

#### ALASKA

Dick Williams  
Alaska Department of Environmental  
Conservation, Pouch 0  
Juneau, Alaska 99811  
(907) 465-2672

#### ARIZONA

Barry Abbott  
Arizona Department of Health  
Services  
1740 West Adams Street  
Phoenix, Arizona 85007  
(602) 255-1162

#### ARKANSAS

Randy Gresham  
O.D.I Coordinator  
Arkansas Department of Pollution  
Control & Ecology  
P.O. Box 9583  
Little Rock, Arkansas 72219  
(501) 562-7444

#### CALIFORNIA

John Bell, Chief  
Facility Evaluation and  
Conformance Section  
Solid Waste Management Board  
1020 Ninth Street  
Sacramento, California 95814  
(916) 322-1769

#### COLORADO

Barbara Bogema, Radiation & Hazardous  
Waste Control Division  
Colorado Department of Health  
4210 East 11th Avenue  
Denver, Colorado 80220  
(303) 320-8333

#### CONNECTICUT

Thomas Pregman  
Principal Environmental Analyst  
Solid Waste Management  
Connecticut Department of  
Environmental Protection  
165 Capitol Avenue  
Hartford, Connecticut 06106  
(203) 566-3672

#### DELAWARE

Kenneth Weiss  
Supervisor, Solid Waste Management  
Branch  
Department of Natural Resources  
and Environmental Control  
Division of Environmental Control  
P.O. Box 1401, Room 203  
Blue Hen Mall  
Dover, Delaware 19901  
(302) 736-4781

#### FLORIDA

John Reece  
Florida Department of Environmental  
Regulations, Twin Towers Office  
Building  
2600 Blair Stone Road  
Tallahassee, Florida 32301  
(904) 438-0300

#### GEORGIA

Islands  
P.O. Box 1115  
Overseas Operator: 6984

## APPENDIX III

### STATE ACTIONS AND APPROACHES TO THE INVENTORY

Paragraphs describing State actions and approaches to the inventory were provided to the Environmental Protection Agency by most of the States that evaluated disposal facilities during Fiscal Year 1982. States which participated during Fiscal Years 1980 and 1981 provided descriptions of their approaches to the inventory which appeared in the two previous editions. They can be found in the following documents:

1. Solid Waste Disposal; Inventory of Open Dumps  
Federal Register; May 29, 1981  
Volume 46, Pages 29064-29149
2. Inventory of Open Dumps; April, 1982  
Available from:  
National Technical Information Service (NTIS)  
5285 Port Royal Road  
Springfield, Virginia 22161  
NTIS Number PB-82-201-617

For additional information about individual States, contact the State Agencies listed in Appendix II.

The following summaries are based on information provided to EPA by the States:

#### Alabama

A total of 41 municipal landfills were inventoried in FY 82. All of the Federal Criteria, except groundwater, were applied to the 41 sites. Two sites were classified as "Open Dumps." Groundwater monitoring wells have been installed at 37 of these sites, but sufficient data have not been collected to address the groundwater criterion.

In summary for the "Open Dump Inventory," a total of 142 disposal sites (all of the municipal sanitary landfills in the State) were inventoried during the period of FY80-FY82. Of those, 18 were classified as "Open Dumps." The most significant benefit of the inventory was the installation of groundwater monitoring wells. Of the 142 sites inventoried, 115 have installed monitoring wells due to geological conditions. This results in some 97% of those sites inventoried that have addressed or are in the process of addressing the groundwater criterion.

#### Arizona

All municipal waste landfills have been inventoried. The Bureau of Waste Control, Arizona Department of Health Services will continue to monitor these facilities throughout the year and update the inventory as necessary. Due to budget cutbacks, inventory of surface impoundments and land spreading facilities will be delayed at least one year.

### Connecticut

The inventory started in July following State Attorney General and EPA approval of an implementation plan on file with the DEP in Hartford. Due process as per State Administrative Procedures Act will be followed on any enforcement action. All mixed waste community disposal site operators were notified of the program prior to initiation and all parties -- owner, operator, town administration, and health officials are invited to attend each field review. Monthly staff meetings of all responsible State agencies make final decisions on findings. Violators are notified, enforcement schedules are drafted and open dumps reported.

Enforcement actions through orders, agreements, notices, permit hearings or legal actions will be taken at the time decisions are made on each site. Most sites listed are already on one such compliance schedule for upgrading or closure. Priority on inventory has been set for mixed and bulky waste sites. Available data, long life and worst cases are given priority. Priority recommendations in EPA's classification manual are also considered.

### Florida

FY-82 Open Dump Inventory activities included follow-up inspection of 12 landfills, preliminary investigation of four industrial disposal sites, and investigation of five private wells suspected of being contaminated. One landfill previously listed as an open dump was removed from the listing.

### Louisiana

Field investigations and classifications for the open dump inventory were conducted by Department of Natural Resources (DNR) personnel. Initial site inspections were made at about 1500 solid waste disposal sites during FY 80. Re-evaluation of these sites consisted of additional inspections and the collection of additional data to support the classification as an open dump. Two hundred and seventy-six sites were classified as open dumps during FY 82.

### Maine

Maine has more than 300 municipal and commercial waste facilities within its boundaries. Over the past year, using State and Coastal Zone Management staff, the Department of Environmental Protection has continued to inspect solid waste facilities with emphasis on the worst problem areas. In the past year many town dumps have been closed and solid waste

disposed of at larger regional sites such as Augusta, Auburn, Sawyers landfill and the Pease, N.H., AFB facility and Turnkey in Rochester, N.H.

The RCRA regulations have been added to the proposed redraft of Maine's Solid Waste Management Regulations and will soon be in place statewide. In the meantime the enforcement and technical staffs have been working constantly with the worst 50 dumps in the State in an effort to close or upgrade them. In addition, increased attention to solid waste management has caused the closure of more than 20 sites in the past year with another 15 to 20 planning to close within the next 18 months.

#### Minnesota

During 1980 the Minnesota Pollution Control Agency (MPCA) conducted an inventory of all active solid waste disposal sites in the state and submitted the names of 84 sites to the U.S. Bureau of Census for publication in the Federal Register on May 29, 1981. During 1981, enforcement follow-up by the MPCA resulted in the closure of 13 of these sites and the upgrading of four more. Three sites were also added to the list during 1981, leaving a net total of 70 solid waste disposal sites still in violation of Federal Criteria and Minnesota solid waste rules. During 1982 enforcement follow-up by the MPCA resulted in the closure of eight sites. Six sites were subsequently added during 1982, leaving a net total of 68 solid waste disposal sites still in violation of Federal Criteria and Minnesota's solid waste rules. MPCA enforcement and planning staff will continue to work to obtain the compliance of sites which remain in noncompliance.

#### Oklahoma

There are approximately 300 landfills in the State of Oklahoma. Two hundred and ten of these are permitted. The Oklahoma State Department of Health (OSHD) classified 53 sites during 1982. These sites were classified as open dumps or sanitary landfills. Some of the sites were removed from the inventory because of upgrading or reclassification to a sanitary landfill.

The classification process involves a file review, request for engineering reports when necessary, and a field evaluation. Actual classification is done by an open dump inventory committee composed of the District Sanitarian, the County Sanitarian, a field specialist from the State Office, and the Director of the Solid Waste Division, or the Chief of the Waste Management Service.

### Oregon

The Oregon Department of Environmental Quality has evaluated 315 solid waste facilities since the open dump inventory began in October 1979. The priorities have been municipal, demolition and industrial disposal sites and industrial surface impoundments. A total of 38 sites are classified as "Open Dumps." Two are removed from last year's list and no sites added. Oregon plans to continue the open dump inventory as State resources allow.

### Pennsylvania

In FY-82, Pennsylvania evaluated a total of 96 landfills for compliance with the groundwater criterion. A total of 292 monitoring points were evaluated at the 96 landfills. Of the 96 sites, 28 were found to be in non-compliance with the groundwater criterion. These 28 sites were submitted to the Bureau of the Census for publication in this year's inventory. In addition, five facilities were removed from the inventory of open dumps.

Pennsylvania has notified the responsible officials of all the facilities listed as open dumps. Pennsylvania is currently in the process of developing compliance schedules for these sites. The Commonwealth is developing these schedules based on its general statutory authority and the regulations promulgated thereunder to issue the kind of compliance schedules anticipated under Section 4005(c) of RCRA.

### Virginia

The Commonwealth of Virginia has inventoried 209 landfill facilities. All the sites were evaluated for the groundwater and gas criteria. Of the 209 facilities, 47 have continuous groundwater monitoring. All the facilities will be upgraded or closed by June 1983.

### Washington

The inventory of open dumps is being updated by the Washington State Department of Ecology, as staff time allows. Since the 1981 installment of the inventory, 17 open dumps were deleted from the Open Dump list, two were added and two were updated. Public health and safety and environmental impact are the factors which determine site inspection priorities. The primary focus is on the industrial disposal facility aspects of this ongoing inventory.

### Guam

Guam Environmental Protection Agency developed its inventory in two sections. The first section identified waste management

facilities presently in operation and satisfied the requirements of RCRA. The second section identified the location and characteristics of illegal and promiscuous dumps on Guam. A strategy for clean-up of these areas is part of Guam's Solid Waste Management Plan. Two of the three sites classified as open dumps have been brought into compliance during 1982.

Puerto Rico

During FY 80-82, municipal landfills were evaluated, and 19 were determined to be open dumps. By the end of FY 82, only 10 of the 19 open dumps remained. Three of these are working under a compliance schedule.
