Defense Plant Corporation,  
Geneva, Provo, Utah.

Gentlemen:

We know that you have continuous rolling facilities in your plant and we have a use for thin sheet.

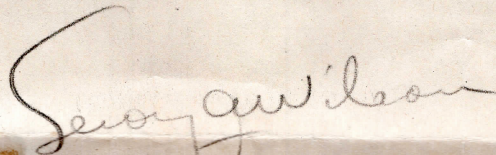

Will you kindly advise us what widths and lengths you can furnish.

Can you furnish sheet in long rolls?

Full information on your facilities will be appreciated.

If you do not care to furnish sheets, will you kindly advise us the size and extent of your rolling mill for sheets and whether or not you would consider selling part or all of your continuous sheet mills.

Very truly,

Leroy A. Wilson.
